

ACADEMY OF SURGICAL RESEARCH

21st Annual Meeting

September 15-17, 2005

Philadelphia Wyndham at Franklin Plaza
Philadelphia, PA

About the Academy:

In 1982, forward thinking scientists concerned about incomplete communication across the disciplines of surgical investigation founded the Academy of Surgical Research. The society fosters interdisciplinary transfer of ideas and theories by offering a common platform through which the reporting of valid surgical research efforts is a reality.

The Academy of Surgical Research was founded to:

- Encourage, foster, promote and advance professional and academic standards, education, research and development in the arts and sciences of experimental surgery.
- Promote, initiate, support, and accomplish academic and practical educational programs, cooperative research, and development in experimental surgery in the public interest.
- Promote humane use and treatment of experimental animals and prevent their use when other means can bring about the same scientific results.
- Cooperate with medial organizations, other scientific organizations, governmental agencies, and other interested parties in establishing, reviewing, and evaluating ethics, theories, practices and research and promotion of the product of surgical research for clinical application.
- Encourage the advancement of the field of surgery in all aspects, including research, education and critical promotion of research products for clinical applications.

CEU Credit

Surgical Research Specialists (SRS) can earn 12 CEU credits of lecture attendance at the 21st Annual Meeting.

Program Goals

At the conclusion of the program, the participants will be able to discuss:

- Proposed and current research efforts in the arena of experimental cardiac, vascular, transplantation, orthopedic and minimally invasive surgery;
- The advantages of required certification of research specialists working in the surgical arena;
- New and updated methods and materials used in human and clinical surgical investigation;
- New procedures that will enhance their own fields of scientific research.

Program Committee

Kimberly J. Bayer, BS, CVT, LAT, SRS
- *Charles River Laboratories*

Matt Flegal, BS - *Pfizer Incorporated*

Teresa R. Gleason, SRS - *WIL Research Laboratories, Inc.*

Diann M. Mendenhall, VMT - *Abiomed*

Randy Pielemeier, SRS, LUT, LATG - *MPI Research*

Registration Hours

Thursday, September 15 10 am - 6 pm

Friday, September 16 7 am - 5 pm
